2025

1. Membuat Project modul8_2311104065

Configure your new project

Console App C# Linux macOS Windows Console

Project name

modul8_2311104065

Location

C:\Users\user\source\repos\KPL_Rengganis-Tantri-Pramudita_2311104065_S1SE-07-02\08_Runtime ...

Solution name ⓘ

modul8_2311104065

☐ Place solution and project in the same directory

Project will be created in "C:\Users\user\source\repos\KPL_Rengganis-Tantri-Pramudita_2311104065_S1SE-07-02\08_Runtime_Configuration_dan_Internationalization\modul8_2311104065\modul8_2311104065\"

2. Membuat BankTransferConfig.cs

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
using System;
using System.IO;
using System.Text.Json;

namespace TJm8_2311104065
{
    public class BankTransferConfig
    {
        public string Lang { get; set; }
        public Transfer Transfer { get; set; }
        public string[] Methods { get; set; }
        public Confirmation Confirmation { get; set; }
    }
}
```

```

public BankTransferConfig()
{
    // Set nilai default
    Lang = "en";
    Transfer = new Transfer
    {
        Threshold = 25000000,
        LowFee = 6500,
        HighFee = 15000
    };
    Methods = new string[] { "RTO (real-time)", "SKN", "RTGS", "BI FAST" };
    Confirmation = new Confirmation
    {
        En = "yes",
        Id = "ya"
    };
}

public static BankTransferConfig LoadConfig()
{
    BankTransferConfig config = null;
    string configFileName = "bank_transfer_config.json";

    try
    {
        if (File.Exists(configFileName))
        {
            string jsonString = File.ReadAllText(configFileName);
            config = JsonSerializer.Deserialize<BankTransferConfig>(jsonString);
        }
        else
        {
            config = new BankTransferConfig();
            string jsonString = JsonSerializer.Serialize(config, new JsonSerializerOptions { WriteIndented =
true });
            File.WriteAllText(configFileName, jsonString);
        }
    }
}

```

```

    }
    catch (Exception ex)
    {
        Console.WriteLine($"Error loading configuration: {ex.Message}");
        config = new BankTransferConfig();
    }

    return config;
}
}

public class Transfer
{
    public long Threshold { get; set; }
    public int LowFee { get; set; }
    public int HighFee { get; set; }
}

public class Confirmation
{
    public string En { get; set; }
    public string Id { get; set; }
}
}

```

3. Membuat banktransferconfig.json

```

{
  "lang": "en",
  "transfer": {
    "threshold": 25000000,
    "low_fee": 6500,
    "high_fee": 15000
  },
  "methods": [

```

```
"RTO (real-time)",  
    "SKN",  
    "RTGS",  
    "BI FAST"  
],  
    "confirmation": {  
        "en": "yes",  
        "id": "ya"  
    }  
}
```

4. Membuat Program.cs

```
using System;  
using System.Text.Json;  
using TJm8_2311104065;  
  
namespace modul8_NIM  
{  
    class Program  
    {  
        static void Main(string[] args)  
        {  
            // Load configuration  
            BankTransferConfig config = BankTransferConfig.LoadConfig();  
  
            // Tampilkan pesan sesuai bahasa  
            if (config.Lang == "en")  
            {  
                Console.WriteLine("Please insert the amount of money to transfer:");  
            }  
            else if (config.Lang == "id")  
            {  
                Console.WriteLine("Masukkan jumlah uang yang akan di-transfer:");  
            }  
        }  
    }  
}
```

```
}

// Baca input jumlah uang
double transferAmount = 0;
while (true)
{
    try
    {
        transferAmount = Convert.ToDouble(Console.ReadLine());
        break;
    }
    catch (FormatException)
    {
        if (config.Lang == "en")
        {
            Console.WriteLine("Please enter a valid number:");
        }
        else
        {
            Console.WriteLine("Masukkan angka yang valid:");
        }
    }
}

// Hitung biaya transfer
int transferFee = 0;
if (transferAmount <= config.Transfer.Threshold)
{
    transferFee = config.Transfer.LowFee;
}
else
{
    transferFee = config.Transfer.HighFee;
}

// Hitung total biaya
double totalAmount = transferAmount + transferFee;
```

```
// Tampilkan biaya transfer dan total biaya
if (config.Lang == "en")
{
    Console.WriteLine($"Transfer fee = {transferFee}");
    Console.WriteLine($"Total amount = {totalAmount}");
}
else
{
    Console.WriteLine($"Biaya transfer = {transferFee}");
    Console.WriteLine($"Total biaya = {totalAmount}");
}

// Tampilkan metode transfer
if (config.Lang == "en")
{
    Console.WriteLine("Select transfer method:");
}
else
{
    Console.WriteLine("Pilih metode transfer:");
}

// Tampilkan daftar metode transfer
for (int i = 0; i < config.Methods.Length; i++)
{
    Console.WriteLine($"{i + 1}. {config.Methods[i]}");
}

// Baca pilihan metode transfer
int selectedMethod = 0;
while (true)
{
    try
    {
        selectedMethod = Convert.ToInt32(Console.ReadLine());
        if (selectedMethod >= 1 && selectedMethod <= config.Methods.Length)
```

```

        {
            break;
        }
        else
        {
            throw new FormatException();
        }
    }
    catch (FormatException)
    {
        if (config.Lang == "en")
        {
            Console.WriteLine($"Please select a valid method (1-{config.Methods.Length}):");
        }
        else
        {
            Console.WriteLine($"Pilih metode yang valid (1-{config.Methods.Length}):");
        }
    }
}

// Konfirmasi transaksi
string confirmationWord = config.Lang == "en" ? config.Confirmation.En : config.Confirmation.Id;
if (config.Lang == "en")
{
    Console.WriteLine($"Please type \"{confirmationWord}\" to confirm the transaction:");
}
else
{
    Console.WriteLine($"Ketik \"{confirmationWord}\" untuk mengkonfirmasi transaksi:");
}

// Baca konfirmasi
string confirmation = Console.ReadLine();

// Cek konfirmasi
if (confirmation.ToLower() == confirmationWord.ToLower())

```

```
{
    if (config.Lang == "en")
    {
        Console.WriteLine("The transfer is completed");
    }
    else
    {
        Console.WriteLine("Proses transfer berhasil");
    }
}
else
{
    if (config.Lang == "en")
    {
        Console.WriteLine("Transfer is cancelled");
    }
    else
    {
        Console.WriteLine("Transfer dibatalkan");
    }
}

Console.WriteLine("Press any key to exit...");
Console.ReadKey();
}
}
```

5. Hasil running

```
C:\Users\user\source\repos\K x + v
Please insert the amount of money to transfer:
1000000
Transfer fee = 6500
Total amount = 1006500
Select transfer method:
1. RTO (real-time)
2. SKN
3. RTGS
4. BI FAST
4
Please type "yes" to confirm the transaction:
yes
The transfer is completed
Press any key to exit...
```
